

# Code-Point Open – Release Note

## March 2022

This release note provides information about the February 2022 release of Code-Point Open.

### UPDATE

Please note that the 2022-02 release of Code-Point Open in the GeoPackage format was found to have the following changes that had not previously been communicated to customers:

- Attribute Names changed from Title case to lowercase
- Table Name changed from code\_point\_open to codepoint
- Column Name changed from geom to geometry

In order to minimise the impact of these changes to users, we are re-supplying the 2022-02 Code-Point Open in the GeoPackage format (as of 4 March 2022) without the above changes in place.

Please note that the underlying data was not impacted in any way.
