

AddressBase® Core Release 25/08/2020

Release Note Version 1.0

GB Coverage

Version	Change
1.0	Initial release

Introduction

This release note provides information about the release of AddressBase Core on **August 25th 2020**.

1. Product counts

Product	Full Supply record count	Change Only Update record count
AddressBase Core	33,042,109	69,072

2. Changed Records

If you receive a Change Only Update (COU) supply for your AddressBase Core product, you will receive Insert, Update and Delete records within the supplied file. The below tables detail the amount of each of these records

Change Type	Count
Inserts	7,353
Updates	23,840
Deletes*	37,879

It is important that COUs are processed with Deletes first, then Inserts and Updates. This is to ensure that updates are applied in the correct order. Guidance of this can be found in Section 5 of the Getting Started Guide on the AddressBase Core Product Support webpage.

*Based on some customer feedback and reviewing our ruleset for the creation of AB Core, there is a slightly higher number of deletes in this release as we ensure only appropriate records are contained within the product.

3. Source data currency

Data Source	Date
Royal Mail PAF	21 August 2020
National Land and Property Gazetteer	21 August 2020
One Scotland Gazetteer	28 July 2020
OS MasterMap Topography Layer	20 July 2020

4. Data Issues

Street Records

There are 15 records in AddressBase Core that incorrectly reference STREET RECORD as the building name in AddressBase Core. This then gives a false single line address. This is due to a classification issue with the source data. All 15 addresses are in the South Lanarkshire authority (GSS code = S12000029). These are currently being investigated and will be fixed in a future release.
