

AddressBase® Islands Products August 2021 Epoch 86

Release Note version 1.0

Northern Ireland, Isle of Man and Channel Islands Coverage

Version	Change
1.0	Initial release

Introduction

This release note provides information about the August 2021 release of the AddressBase Islands products.

These products were released to customers on **August 5 2021**.

Product counts

Product	Full Supply record count	Change Only Update record count
AddressBase Plus	1,108,702	14,130
AddressBase Premium	-	-
Street	47,083	101
Street Descriptor	47,083	44
BLPU	1,181,457	13,466
Classification	1,181,457	4,126
LPI	1,189,800	1,640
Organisation	42,133	17
Delivery Point Address	936,701	6,715
Application Cross Ref.	1,249,430	1,334
Successor	0	0

Changed Records

If you receive a Change Only Update (COU) supply for your AddressBase Islands product, you will receive Insert, Update and Delete records within the supplied file. The counts of these records can be found below.

AddressBase Plus

Change Type	Count
Inserts	1,391
Updates	12,613
Deletes	126

AddressBase Premium

AddressBase Premium Table	Inserts	Updates	Deletes
Street	44	57	0
Street Descriptor	44	0	0
BLPU	949	12,478	39
Classification	949	3,138	39
LPI	1,039	562	39
Organisation	0	0	17
Delivery Point Address	5,313	474	928
Application Cross Ref.	924	348	62

It is important that COUs are processed with Deletes first, then Inserts and Updates. This is to ensure that updates are applied in the correct order. Guidance of this can be found in Section 8 of the Getting Started Guide on the AddressBase Product Support webpage.

Source data currency

The following information relates to the currency of the source data used in the creation of Epoch 84:

Data Source	Date
Pointer (Northern Ireland)	07 June 2021
DigiMap (Channel Islands)	28 June 2021
Isle of Man	28 April 2021
Royal Mail PAF	02 July 2021

Data Issues

AddressBase Plus Islands Issues

Affected output formats: GML

- a. **Incorrect namespace for specification version**

We have identified that the namespaces relating to the AddressBase schema have accidentally been replaced for AddressBase Islands. This is due to the specification for AddressBase having changed, though this change did not affect AddressBase Islands.

Further consultation since the last release has resulted in our position changing in terms of misaligning the schema versions for AddressBase and AddressBase Islands. Our intention now is to increment the schema version used for AddressBase Islands to 2.1 as is currently, albeit wrongly, the case.

We will issue further communications alongside the amended specification for this. Please note that aside from a new schema specification number there will be no breaking change in the update. RPC code values will remain identical to current ones, though their definition wording will change.

As the change is not a breaking one, loading processes can safely ignore the version change for the time being or edit the GML files manually and change all references to mentioning AddressBase versions 2.1 to 2.0 in the GML headers.

Changes are highlighted below:

```

```

Affected output formats: CSV and GML

a. Missing Parent UPRNs

1,292 records which exist in AddressBase Plus Islands declare a Parent UPRN which cannot be found in product. This is because of the background logic used to create the product and this will be reviewed in the future.

AddressBase Premium Islands Issues

Affected output formats: GML

a. Incorrect namespace for specification version

We have identified that the namespaces relating to the AddressBase schema have accidentally been replaced for AddressBase Islands. This is due to the specification for AddressBase having changed, though this change did not affect AddressBase Islands.

Further consultation since the last release has resulted in our position changing in terms of misaligning the schema versions for AddressBase and AddressBase Islands. Our intention now is to increment the schema version used for AddressBase Islands to 2.1 as is currently, albeit wrongly, the case.

We will issue further communications alongside the amended specification for this. Please note that aside from a new schema specification number there will be no breaking change in the update. RPC code values will remain identical to current ones, though their definition wording will change.

As the change is not a breaking one, loading processes can safely ignore the version change for the time being or edit the GML files manually and change all references to mentioning AddressBase versions 2.1 to 2.0 in the GML headers.

a. Street Incorrect Coordinates –

There are 143 Streets which have incorrect start or end coordinates of 000000. The unique identifiers can be provided upon request through your Relationship Manager.

Next Release

The next release of AddressBase, Epoch 86, is scheduled for release on Thursday 16 September.
