

# Code-Point Release Note November 2023

This release note provides information relating to the November 2023 release of Code-Point.

## Product issues and enhancements

### Postcode issue

The postcode KW17 2BD has missing administrative boundary and health codes: local health code, regional health code, county, district, and ward codes. This is being investigated with the intention that it will be fixed for the February release.

### Next release

The next release of Code-Point is scheduled for February 2024.
