Introduction

About this guide

Using OS VectorMap District (Raster)

- 1 Downloading OS OpenData
- 2 Opening OS OpenData in QGIS
- 3 Opening and saving a map in Composer

INTRODUCTION

ABOUT THIS GUIDE

This is a simple guide for those with no previous knowledge of geographic information systems (GIS). This guide will introduce users to downloading OS OpenData™, creating simple maps with Quantum GIS (QGIS), and exporting map images as a PDF or JPEG file.

The aim of this exercise is to produce a map of Southampton at a scale of 1:17 000.

OS VectorMap® District (Raster) format is updated twice a year and is appropriate for maps of scale 1:15 000-1:30 000. If a greater level of detail is required we recommend OS VectorMap Local.

For more information on OS VectorMap District (Raster) format go to:

www.os.uk/business-and-government/products/vectormap-district.html

Product: OS VECTORMAP
DISTRICT (RASTER)

About this guide

1 Downloading OS OpenData

2 Opening OS OpenData in QGIS

3 Opening and saving a map in Composer

1 DOWNLOADING OS OPENDATA

Firstly, OS VectorMap District needs to be downloaded from the Ordnance Survey site:

www.os.uk/opendatadownload/products.html

Scroll to **OS VectorMap District**. Ensure that the data type is raster, and select grid reference square using the two letter reference list. Southampton lies in the **SU** grid reference square, so **SU** has been selected from the reference list.

OS VectorMap™ District

Data type: Raster

Supply format: GeoTIFF Full Colour ▼

Version: 09/2014

Selecting National Grid Reference squares

Using the map on the right, or a [full size version](#), identify which square(s) you want to download. Select or deselect squares by clicking on the map on the right.

To manually select or deselect multiple squares from the two letter reference list, press and hold the CTRL key (Windows) or the Command key (OS X) while selecting from the list.

Great Britain	<input type="checkbox"/>	N/A

Introduction

About this guide

Using OS VectorMap District (Raster)

1 Downloading OS OpenData

2 Opening OS OpenData in QGIS

3 Opening and saving a map in Composer

Here is a larger image of the National Grid Reference squares:

				HP (N42)		
			HT (N31)	HU (N41)		
	HW (N10)	HX (N20)	HY (N30)	HZ (N40)		
NA (09)	NB (19)	NC (29)	ND (39)			
NF (08)	NG (18)	NH (28)	NJ (38)	NK (48)		
NL (07)	NM (17)	NN (27)	NO (37)			
	NR (16)	NS (26)	NT (36)	NU (46)		
	NW (15)	NX (25)	NY (35)	NZ (45)		
		SC (24)	SD (34)	SE (44)	TA (54)	
		SH (23)	SJ (33)	SK (43)	TF (53)	TG (63)
	SM (12)	SN (22)	SO (32)	SP (42)	TL (52)	TM (62)
	SR (11)	SS (21)	ST (31)	SU (41)	TQ (51)	TR (61)
SV (00)	SW (10)	SX (20)	SY (30)	SZ (40)	TV (50)	

- Tick the box for Download (as seen in download page image).
- Scroll down to the bottom of the page and click **Next**.
- Fill in the details required and you will receive an email with a link to download the data as a .zip file. Save to a designated folder. Once the download is complete extract the file.

About this guide

Using OS VectorMap District (Raster)

1 Downloading OS OpenData

2 Opening OS OpenData in QGIS

3 Opening and saving a map in Composer

2 OPENING OS OPENDATA IN QGIS

- Open QGIS from **Start>All Programs>QGIS Brighton>QGIS Desktop 2.6.1**
- To open the OS VectorMap District (Raster) format Select **'Add raster layer'** (see below)

- Click **'Browse'** and navigate to the downloaded files that have been extracted. Select the required TIFF files. In this case **SU41** is the required image. Click **'Open'**.

About this guide

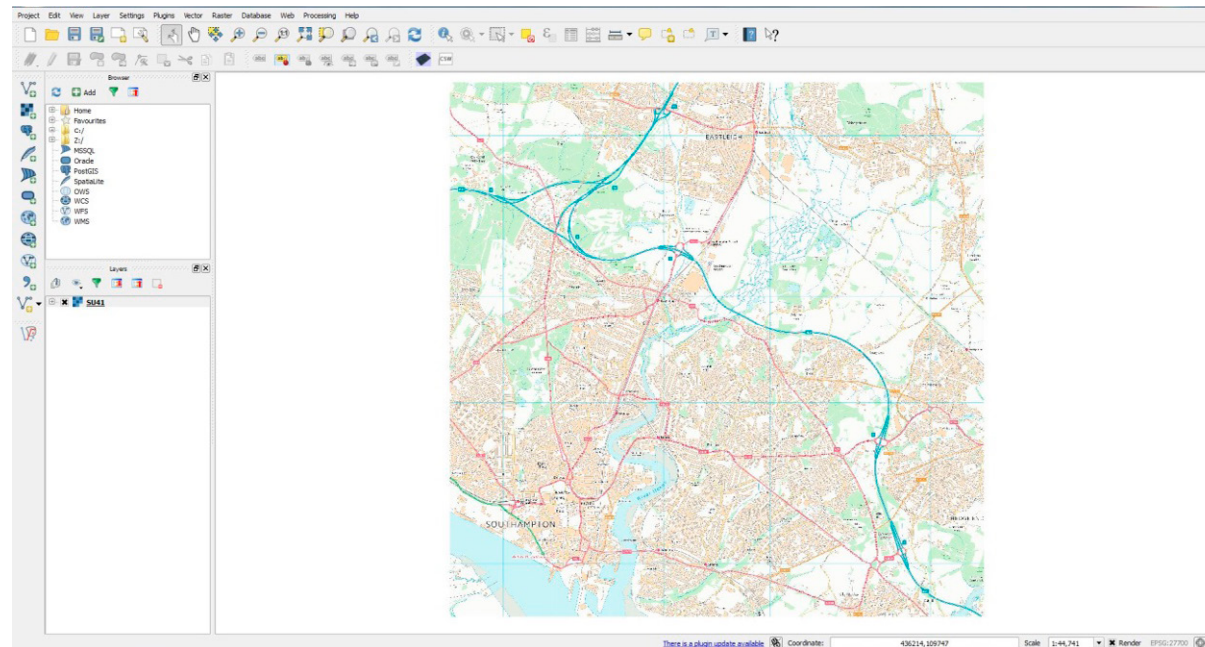

Using OS VectorMap District (Raster)

1 Downloading OS OpenData

2 Opening OS OpenData in QGIS

3 Opening and saving a map in Composer

- The map is most functional for scales 1:15 000-1:30 000. For this tutorial we want a map of an area of Southampton at a scale of **1:17 000**. Use the '**Pan tool**', '**Zoom in**' and '**Zoom out**' to position the map over Southampton at an appropriate scale, or alternatively set the scale of the map by typing in the scale bar, which is at the bottom of the screen.

Introduction

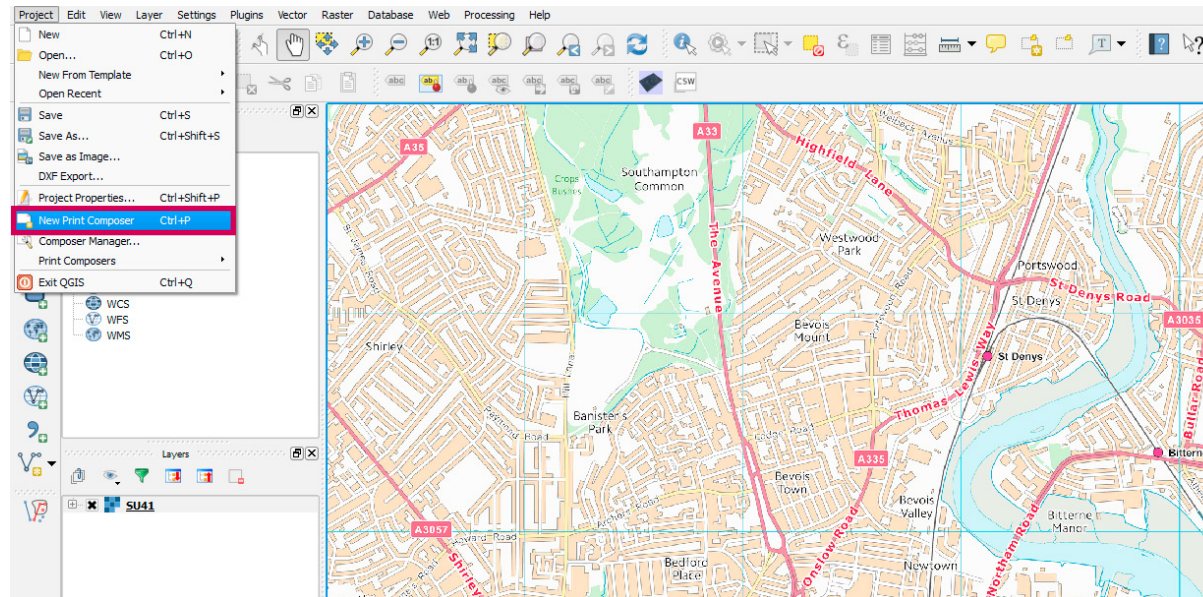

About this guide

Using OS VectorMap District (Raster)

1 Downloading OS OpenData

2 Opening OS OpenData in QGIS

3 Opening and saving a map in Composer

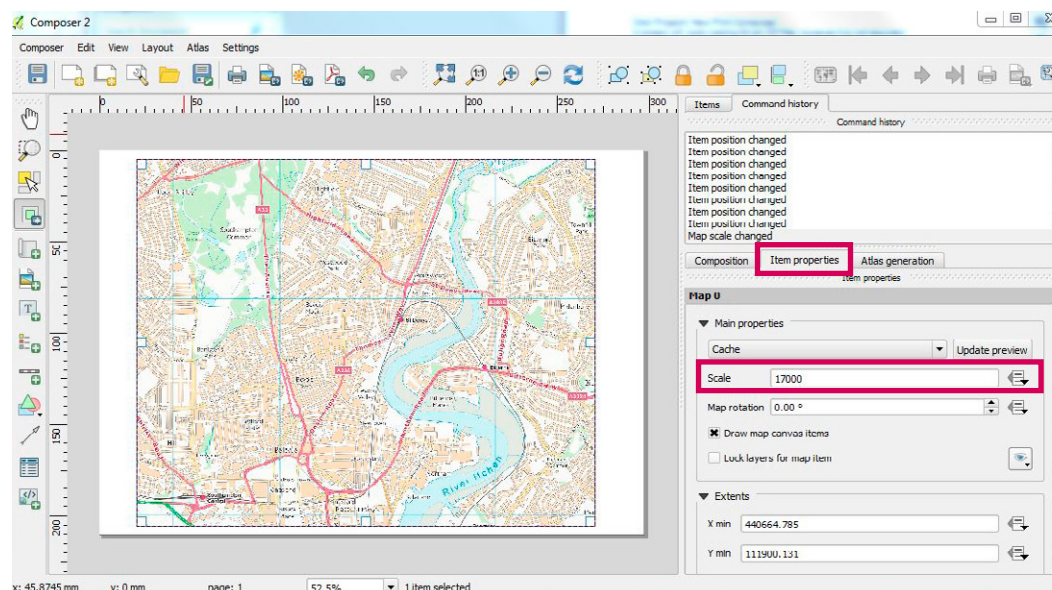

- A new window will open showing a blank page. To insert the map from QGIS click on **'Add new map'** (see below).

Left click and then drag a rectangle to select the dimension of the added map. Once added the position of the map within the frame can be adjusted by selecting **'Move item content'** (see below).

- Click **Item Properties** on the task bar on the right. The specific scale can be selected here, and if you scroll down there are several other options including **Position and Size**. Here the dimensions of the map can be adjusted in millimetres.

Careful, as when altering the position and size the scale will also change.

Note: OS VectorMap District is most useful to design a map within scales of 1:15 000-1:30 000, for this map of Southampton the selected scale is 1:17 000.
